

7inch OSRAM QAS SPEC

SKU: B6DL7C

BACK TO BASICS.

If you're looking for a top-quality, durable driving light, then you need the BASE6 Basics Series 7" Driving Lights. These lights are built with genuine OSRAM LED chips and tough polycarbonate lenses to withstand whatever you throw at them. The heavy duty aluminum housing is powder coated to resist wear and tear, and the Deutsch connector ensures a reliable connection. So whether you're using them for work or play, you can rest assured that these lights will perform flawlessly.

GENUINE OSRAM.

Running genuine Osram LED chips, which have been designed from scratch with the future needs of industry professionals forefront of its mind! This new breed of LED delivers sharper light, and increased brightness all with a lower current draw.

ITS IN THE DETAILS.

Full-size output compact light. Introducing the Back to Basics series 7" driving lights. These driving lights are designed with the everyday Australian in mind. Whether its around town, or pushing your limit offroad on the weekend. You can't go past the small form factor that is the 7" LED Driving Light.

General Electric Lexan Lens - 220x Stronger than Glass!
DuPont black paint - holds up against harsh Aussie sunlight for years to come.

Marine stainless brackets - No paint means no flaking
50% Flood - 50% Spot reflector design. All in one coverage, no light bar needed!
